Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear what applicant means by addition current measuring device, are these extra current sensors or just a name?

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Iijima et al (US Patent 6462491).

Although claims 2-7 have been rejected under 112, second paragraph for being unclear, the examiner has applied prior art against the subject matter of claims 2-7 as it is best understood.

Claims 1 and 2, Iijima et al describe a motor control apparatus comprising current sensors 21u and 21v for measuring the current of two of the motor windings and a

Art Unit: 2837

control signal generating circuit 22 for estimating a state of the motor and controlling the current through the motor based on the measured current signals.

Claims 3, 4, 8, Iijima et al describe in figure 27 a neutral point measuring device and a control signal processing circuit for determining the state of the motor based on signals from phase currents and the neutral current signal.

Claims 5, 6, and 9, Iijima et al describes at least two of the three motor phases being independent.

Claims 7 and 10, Iijima et al describes in figure 1 a control apparatus for a three-phase motor.
